

It's about more than just keeping the lights on.

It's about...

...giving back to seniors.

Doris Maciel – My home had winter weatherization and energy-saving devices installed through Sierra Pacific's Senior Power Program. Best of all, it was all free.

...improving financial strength.

Sathien Arulanantham – I'm one of Sierra Pacific's financial analysts working to improve our credit rating so we can lower your energy bills. It's long hours at the computer, but I know it will pay off.

...conservation.

Peggy Christianson – When I purchased a new energy star refrigerator for my ranch, Sierra Pacific hauled away my old model for free. And better yet, they even gave me a rebate. Pretty cool.

...planning ahead.

John Frankovich – As manager of the newly upgraded Tracy Generating Station, I'm working to free Nevada from the volatile out-of-state energy markets that will lower bills. We've got the power to do it.

...alternative energy.

John C. Sagebiel – I believe my energy-efficient homes are a more sensible way to live. Getting paid a rebate for my solar power generators as part of Sierra Pacific's SolarGenerations Program is a nice bonus.

...volunteering our time.

Gayle L. Anderson – I'm one of the 1,083 employees Sierra Pacific encourages to go out and help the people in my community. It's the type of work I think makes people humble for the better.

...providing customers with choices.

Anthony Fodera – In customer service, I'm giving customers choices that help make their bill paying as easy as possible. Any time I get a call, I put myself in their shoes.

**It's about our community.
Because we're customers too.**
